

Amendments to the Abstract

Please substitute the paragraph presented on the next page for the abstract now appearing in the currently filed specification:

Abstract

A microscope system includes a microscope, a digital camera and a computer system. The microscope has an automatically adjustable subassembly having an adjustable element. The digital camera acquires image data of an image of a specimen. The computer system has a display and a storage unit configured to store the image data and to store, associated with the image data, data defining a setting of the automatically adjustable subassembly corresponding to the image data.
